## E-LEARNING PRODUCTS:

**GENEXIS** – is an e-learning solution based on exercise generation engine providing all of the traditional features and benefits of online learning as well as ensuring additional advantages of content generation and online system of courses. This system has been developed to improve the efficiency of the educational process as well as the quality control in different educational institutions and organizations (mainstream schools, vocational schools, higher educational institutions, different course providers etc.).

**www.uzdevumi.lv** — online learning portal and virtual school. This web based e-learning solution has transformed the mundane study process into an adventure. The students have access to theoretical materials, tasks and tests in various subjects — mathematics, physics, chemistry, history languages etc. They can also monitor their learning progress or compete with each other and win exciting prizes every week!

## Education projects:

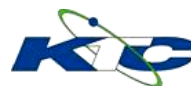

Multilateral Project for Transfer of Innovation within the *Leonardo da Vinci Programme*: Computer based Exercise Generation and Evaluation System for Mathematics, Physics and Chemistry subjects – GENEXIS. The aim of the project was to adopt the GenExis system for use in 5 different countries and it has been developed in co-operation with 6 partners from 5 countries – Daugavpils University, Business Innovation Centre of Latvian Electronic Industry (Latvia), KTU Regional Science Park (Lithuania), Baltic Innovation Agency (Estonia), Accent International Language Consultancy (UK) and elfa s.r.o. (Slovakia). Overall there are 21 vocational education institutions involved in the project, including Bicton College in UK, 5 vocational schools in Slovakia, large VET centers in Estonia and Lithuania as well as 5 schools in Latvia.
